

ORIGAMI: BooK of 20 Pages

~Neelesh K

Book of 20 pages(front+back) + cover: Designed and Folded by Neelesh K from 30cmX30cm Uncut Square Sheet.

The CfC Challenge (Oct '25) CP reminded me of this simple book design. I had folded this years ago, and have been working on a similar design for something advanced. Folders might recognise it as Hans Birkeland's design too - I only later discovered his ingenious design. The page locking feature I learnt from his design. So it's my duty to admit this design is inspired by Hans Birkeland.

8X8 MULTIFORM CP -----> BOOK CP

1. Start with 30cm Square

2. Pre-crease 8x8 grid

3. Crease the diagonals

4. Pleat as shown

5. Fold the edges as shown. The pages will be formed from the edges.

6. Fold edges as shown.

7. Begin to collapse as shown...

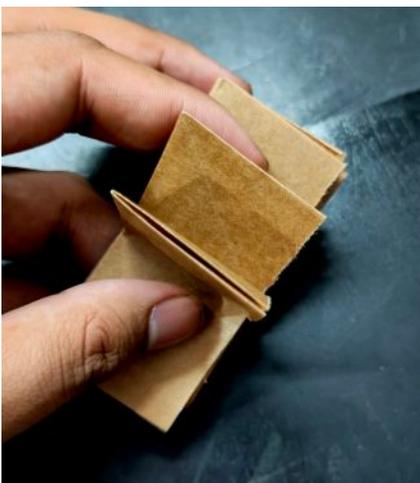

8. The bottom edge will be thicker, forming book cover.

9. Collect the flaps as shown - these are the pages. Bottom thicker flaps form book cover.

10. 4 pages formed from the square's corners will be split at the bottom...

11. ...like this one. Open it from the bottom...

12. Fold this triangular flap inwards, so that these 2 layers get locked. It's a way to lock the split-ends of the flap...

13. ...like this. Repeat for other 3 corner flaps/pages.

14. Top view of finished model.
